Ed Engineer

VP of Engineering Xxxxxx Xxxxxx

Summary

I am an engineer, mentor, author, speaker & technology executive. I build high-performing technology teams that share a passion for software design and deployment.

If you would like to see a little bit more about me, take a look at my GitHub README: <https://github.com/namexxxxxx/manager-readme>

Experience

Contrast Security, City, State year - Present

VP of Engineering

Venture-backed cloud security startup which has raised \$119M from strategic investors such as: Acero Capital, General Catalyst, Battery Ventures, AXA Financial, M12 and Series D (\$65M Warburg Pincus); Contrast Security is the world's leading provider of security technology that teaches software engineers about application security anti-patterns and enables software applications to protect themselves against cyber attacks, delivering the world's first comprehensive platform for protecting enterprise applications from within.

Blackboard, City, State years

VP, Engineering (years)

Oversaw strategic definition and operations for Blackboard's portfolio of mobile, SAAS and enterprise products in the areas of performance/ scale, security, continuous integration and public cloud deployments/ operations. This division accounted for 350+ engineers throughout 15 international offices. These products represented over \$630 million in recurring revenue.

VP, Performance, Security and Platform Engineering (years)

Oversaw strategic direction of development operations, infrastructure, experimental R&D, performance, and security engineering activities for Blackboard's flagship product Learn. Additionally, lead development of database development, continuous delivery, continuous integration, platform infrastructure, and quality engineering. Oversee public cloud products running Amazon (AWS) and RackSpace.
